KYOCERA

Kyocera security is Keypoint validated

Security, Kyocera's signature dish, is at the heart of all our innovative devices.

KYOCERA EVOLUTION SERIES FIRMWARE
BLI
SECURITY VALIDATION TESTING
2022
DEVICE PENETRATION
FROM KEYPOINT INTELLIGENCE

The Evolution Series has earned the BLI Security Validation Testing seal.

Kyocera is an industry leader in this field.

Our signature features

When it comes to security, we take no risks. The Kyocera-dubbed K-Level is available as standard with our Evolution Series fleet and is another example of why security is our forte. Discover some of its state-of-the-art features:

Stick to the rules!
End-of-life sanitization compliantly removes data when you choose.

Watch like a hawk!
The Evolution Series detects unapproved changes or access.

Hit the ground running!
Set up MFPs with the highest level of protection quickly and easily.

Leave nothing to chance!
Our complete security stops hackers through encrypted networks.

They say the secret to success is a solid foundation and **K-Level** has the strongest defense:

1 Work together securely without cybersecurity threats.

2 Boost your reputation as a reliable and compliant firm.

3 Avoid costly data breach penalties and save money.

4 Get industry-leading security available from day one.
