

We're the industry's color champion

Kyocera's award-winning TASKalfa series once again raises the bar in A3 technology.

Keypoint Intelligence – the global data and market intelligence leader for the digital imaging industry – has honored Kyocera with the BLI 2024-2026 Most Colour Consistent A3 Brand Award.

Here's why our devices come out on top:

Proven quality

The Kyocera lineup showed superior performance during Keypoint Intelligence's testing across the entire A3 line.

Ahead of the curve

Kyocera's fresh, broad portfolio is ready to exceed the needs of hybrid working environments.

Exceptional reliability

Testing showed Kyocera's consistently strong performance for reliability, ease of use, and colour consistency.

Sustainable choice

The black toner bottle's reusability as a waste toner container was deemed to be an excellent innovation to reduce waste.

Low storage requirements

The below-average colour scan file size means files can be processed faster and occupy drastically less hard drive space.

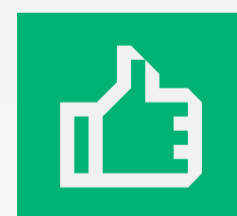

Fast starts

The consistently faster-than-average job stream and first print out times of Kyocera devices drive productivity.

Seamless searches

The above-average searchable PDF accuracy allows users to find key information quicker.

Easy maintenance

Kyocera's A3 devices are, according to Keypoint Intelligence, "easy to use and simple to maintain."

This prestigious recognition, along with **10 individual BLI 2024 Pick Awards** for TASKalfa devices and the highly-coveted **Gold Reliability certificate**, validate Kyocera's status as being head and shoulders above the rest in A3 technology.
