

We've won gold!

The annual BLI Line of the Year Awards are the most prestigious that Keypoint Intelligence offer, and Kyocera has won the **2024 A3 Line of the Year Award**.

Keypoint Intelligence is a global data and market intelligence leader for the digital imaging industry, and their awards are based on thorough testing over a period of time.

Here's how our A3 line made it to the winner's podium:

Fast starts

The consistently faster-than-average job stream and first print out times of Kyocera devices ensure you're first to the finish line.

Gold-standard quality

This award certifies that Kyocera's A3 products consistently performed above average throughout rigorous testing.

Customer-centric innovation

Keypoint Intelligence analysts and technicians also put a lot of weight on user-friendliness, device features and across the entire A3 portfolio.

Range of solutions

The A3 Line of the Year Award honors brands that provide a broad range of hardware that suit diverse user needs.

Ahead of the curve

Kyocera's broad portfolio is designed to facilitate smoother hybrid working, helping remote workers go for gold.

This prestigious recognition, along with **10 individual BLI 2024 Pick Awards** for TASKalfa devices and the highly-coveted **Gold Reliability certificate**, validate Kyocera's status as being head and shoulders above the rest in A3 technology.
