

TASKalfa MZ3200i and TASKalfa MZ4000i:

Your perfect partner

Today's business landscape is evolving—**is your technology?** Kyocera has designed the new TASKalfa devices to boost productivity and security while remaining cost effective.

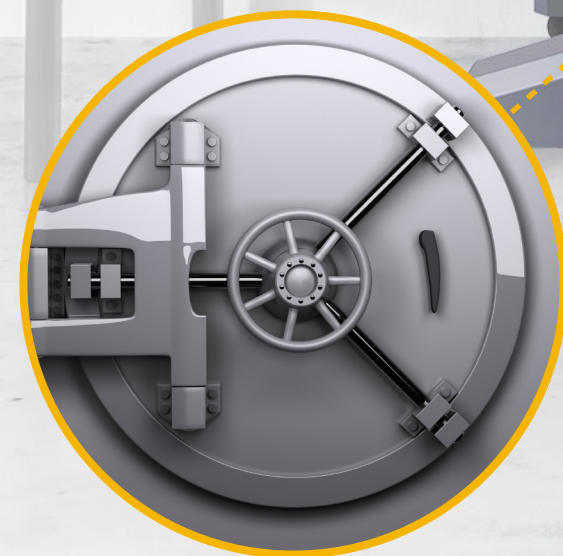

Super-intuitive interface

The 10.1" color touch screen is easy to use, making printing, scanning, and copying stress-free.

Productive scanning

The new staple detection feature is combined with lightning-quick scanning speeds of up to 200 ppm and a capacity of 320 originals to minimize downtime and maximize availability

Unbeatable security

The device supports the latest security standards and certifications like FIPS 140-2 and HCD-PP.

Output on your terms

With the new touchless ID Card Print feature - you can now authenticate and print without having to physically touch the user interface.

The best work companion is also cost-effective:

Future ready

The TASKalfa devices make scalability easy; when you're ready to grow, our devices can handle it.

More productive

The new ASIC Chip technology improves PDF print productivity and also helps provide better (TEC) improving overall cost.

Eco friendly

Utilizes a more environmentally friendly toner design that contributes to better overall sustainability.

A helping hand

Kyocera Fleet Services option can be automatically downloaded to your device, so our technicians can watch over your printer remotely.
